Abstract submission information Posters and Videos

Abstracts can be submitted in Portuguese or in English at www.admedic.com and must not exceed 4.000 characters (including spacing).

Abstracts must comply with the following structure:

- Introduction
- Aim of the study
- Materials and methods
- Results
- Discussion/conclusion

The deadline for submission is October, 18th

Accepted posters will be displayed in digital format (e-poster). All posters will be evaluated and some will be selected for oral presentation on the main conference room.

Video submission

Video abstracts must be submitted online at www.admedic.com. The corresponding video must be simultaneously sent to ana.montes@admedic.pt, otherwise it will not be considered.

Maximum video duration: 5 min

Abstracts will be blindly reviewed by the panel. As so, they must not contain any information that can identify the authors and/or the place of work.

Upon submission, abstracts can only be changed online (under “my submissions” section on the website) until the final submission deadline.

The prizes for the best works presented will be financially awarded after publication of an article in the “Acta Urológica Portuguesa”, the Portuguese Urology Association Scientific Journal.
