## EUROPEAN VULVOVAGINAL DISEASE COURSE

Dear Colleagues,

On behalf of the ISSVD Executive Council, Scientific Committee, and Local Organizing Committee, it is our great pleasure to host the 1<sup>st</sup> European Vulvovaginal Disease Course of the International Society for the Study of Vulvovaginal Disease!

Goal number one of the ISSVD is “to promote international communication among gynecologists, pathologists, dermatologists, and related disciplines, and to establish international agreement on terminology and definitions of vulvovaginal diseases”. For this course we have gathered more than 150 participants, covering each of those medical specialties, as well as nurses and physiotherapists. At least twelve countries will be represented! Different countries, different areas of knowledge gathered with one same interest, using one sole language.

The second goal of the ISSVD is “to promote clinical investigation, basic research, and dissemination of knowledge in this field”. What better way to accomplish this goal than promoting high level, accessible courses? A significant number of participants are residents – the future!

We hope this (basic) course fulfills all your expectations and that it may be a seed that will lead you to join the ISSVD and attend the **XXV World Congress and Postgraduate Course (Advanced)** to be held in Torino, Italy, 16-20<sup>th</sup> September, 2019. We are sure your patients will benefit from it!

While in Porto, find some time to enjoy the city, taste the food and have a glass of Port!

Thank you for your presence. We hope you become part of this family!

President, ISSVD

Pedro Viera Baptista, MD
